no more updates, don't buy. This is one of the more creative games I've played in the RPG field recently. Although its story is opaque and difficult to discern at times, it's a quite meaningful mystery story.

The key attraction, however, is the combat... where you're forced to fight not physical monsters you can squish, but nightmares and dark memories you are incapable of harming. It's a puzzle-strategy game where you must build your character around psychological defense mechanisms that will allow you to outwit the demons in your character's own mind. (Denial isolates you from damage. Sublimate fantasies that the nightmares have to tear down before they can reach you. A slight bout of schizophrenia displaces the target of the nightmare's blame.)

It's downfall is that it's a great idea on a terrible engine (Adobe AIR) that is scarcely capable of handling a game this complex. It runs bizarrely slow when many units are on the field.

Still, if you want a strategy RPG that involves actually using strategy instead of stats for a change, this game shows higher-budget titles how it's done.. Meh, it's "okay" really. It's essentially a slightly worse clone of a bunch of other TDs. Doesn't do anything really new, but it's playable if you're looking for another TD to play.. I had streamed this game with only a few viewers. We didn't get some of the early game. There was a lot unexplained, we felt. Like the bouncing around time, the awkward bathroom humor. The abuse was very mature, we didn't mind it but it was rough. I got to a point where I couldn't defeat the worm. I know the game prompted to train, kind of, but didn't really seem to offer a hell of a chance for it.

Not sure how to rate game. At all. I'm going to go with a thumbs down, but maybe in the future it will improve or the next game the company puts out will be better.. A simple bullet hell with a metagame leveling structure, The Weaponographist is a medicore rehash of flash games we've all played for free. If you've played games before, you've already played this one. And if you've played 9 minutes of this game, like I have, you've already played the whole game.

The concept is good. Gameplay is fun.

The game is CPU intensive but shouldn't be. It is badly optimized, it lags horribly. It can become a slide show sometimes.

There's also a UI problem where you can use your gamepad for everything except for login into your EA account. At that exacte moment you have to use your mouse.

The puzzle difficulty is fine, but the challenges are impossible. I recommend this game only if it's on sale for 5\$ or less. You can finish it in a cople of hours.. Gorgeous, keeps you on your toes. Downsides are the very repetitive soundtrack and the fact that it's pretty short.. Great fun. extraordinary graphic and music. However, if considering it a game, it is too short and with little replayability.. its bugged and it doesnt work and also i cant get my money back. I GIVE IT 5 RKOS OUTTA NOWHERE OUT OF 5 RKOS OUTTA NOWHERE. great coop game with good progression in difficulty and fun combat. Suck my chode Epic games. Really short game, not very fun or interesting and has bad controls. It's cheap, but not worth it. Use your money buying another game. Do not recommend it!. My life was a wreck before I found Beerman. I cope with depression and Beerman helps me forget about it. I connect with Beerman on a spiritual level. I'm so greatful for whoever gifted me this game because I would not be the way I am today. The voice acting is top notch. The characters feel like real people not like the robots that Mass Effect Andromena gave us. The gameplay is simple but addictive. With an amazing story, great characters, amazing voice acting, you should buy yourself a copy of Beerman to be changed like I was.

Update:

#lvl 16 time fix

#achievement fix

#few bugs fixed. **Big Update!!!:**

-mouse now in game

-blink fixed

-controls can be changed

-lvl 21,24,25,28,33,36,37,38,43,44,47,48,49 are easier now. **Slash It Ultimate released!:**
